Robert Morse

Director of Operational Services

Central Unified School District

4605 North Polk Avenue

Fresno, Ca 93722-5334

RE: COSTS TO CONTRACT OPERATE AND MAINTAIN WATER SYSTEMS

Dear Mr. Morse,

Water Dynamics is proposing to operate and maintain the water systems at the following sites:

1. Central West Arts Center (formerly Pershing High School)
2. Houghton-Kearney School
3. Central High School West Campus
4. Roosevelt School
5. Madison Elementary

Water Dynamics will provide a state certified operator to perform all services necessary for system operation. In addition, Water Dynamics will prepare the annual Consumer Confidence Reports (CCR) and any documents due to the State Water Resources Control Board. The work will be on a time and materials basis rather than a fixed price to keep costs lower. Our rate schedule is enclosed as part of this proposal. Invoicing will occur twice monthly and will become due in thirty days.

The Water Dynamics operator will visit each water system on a weekly basis. Should a system require troubleshooting or problem resolution, the number of visits in a given week or month may increase for the required time to satisfactorily resolve the issue. The estimated cost per school is attached.

Water Dynamics will perform routine sampling in accordance with each water system's water quality monitoring schedule of analysis to maintain compliance. All laboratory analysis will be performed by Moore Twining Laboratories with costs billed in accordance with the laboratories rates. Water Dynamics is a general engineering contractor with mechanical and electrical support staff to resolve control, operational and mechanical problems which may arise. Water Dynamics shall obtain prior written authorization by Central Unified School District for all repairs, parts, materials or services costing in excess of a \$500.00 ceiling amount per site on a monthly basis.

4877 W. Jennifer, Suite 104
Fresno, CA 93722

E-Mail: watdyn@aol.com

Fax: (559) 271-0294

Phone: (559) 271-0953

*Note: The attached estimates were formulated to account for a dedicated trip should this become necessary and accounts for the months where a fifth site visit is possible. Also, the water quality constituents included are for the contracted period only and do not encompass monitoring for the entire calendar year. The attached estimates do not reflect or account for any increase in monitoring, new monitoring requirements imposed on a water system, emergencies resulting in outages and necessary repairs, bacteriological problems or incidents requiring further investigation, backflow testing or regulatory inspections. I may be contacted regarding this matter at any time: (559) 708-1203.

Gross Estimate Total (Tentative) for all (5) water systems operated by Water Dynamics for the contract period of July 1st, 2018-June 30th, 2019 is \$46,424.40.

Regards,

Derek Dill

Operations Manager
